

## Vital Statistics: (Source: **Child Find Ontario**)

Over 60,000 children are reported missing every year in Canada, with Ontario having the highest proportion per capita at almost 20,000. The key to recovering these children is quick action by parents and law enforcement agencies. Statistics also show that **“the first 2 hours after a child has gone missing are the most critical.”**

### Why the EZ Child ID System?

MasoniCHIP Ontario will be using the most comprehensive digital fingerprinting child identification system available. EZ Child ID worked directly with the National MasoniCHIP foundation in developing this software. They have worked with law enforcement officials to ensure that this digital fingerprinting system is up to their standards. They have taken it one step further and included a *digital fingerprint analysis* software package to make sure all the necessary *“points”* on a fingerprint are obtained. This will ensure that all the vital information required by the Amber Alert system is captured. This software even records a digital video with voice, which is saved in digital avi format. The EZ Child ID form includes all 10 fingerprints and is saved in the universal PDF format. The parent not only receives a printed EZ Child ID form, they also receive a CD with all the information on it. This allows the parent the opportunity to reprint the EZ Child ID form at home if they desire. To help protect from identity theft, the software was written so that no information from the child is saved on the computer. Once you start over, all of the data is permanently erased. **The parent is the only person who retains their child’s information.**

Fingerprint Analysis Software

### Why go to this extent?

All of this technology aids in the reporting time if a child has gone missing. The parent can take the CD to a police department to be downloaded, or even email the form. There is no other system that is as comprehensive as the EZ Child ID System. To make it even better, the system comes completely assembled and can be *set up in under 30 seconds!*

### Easy to Use:

The EZ Child ID System was developed from the ground up with “Technology Made Simple”. The software was designed so that with only 5 minutes of training anyone can use it. There is a quality data check list which verifies that you have completed each step correctly. There is also an easy to use step by step instruction booklet included with every machine. To the right, you will see a sample of the bio-sheet that can be printed, and below is a photo of the actual unit that MasoniCHIP Ontario will be using. **Cost is \$3,000 U.S. per unit.**

### Introducing The Complete All-In-One Child ID System

### KEY PROGRAM FEATURES

- Will scan all 10 fingerprints
- Produces a still photo
- Produces a video with audio
- Burns all info to CD-Rom
- All files are deleted after each session
- MasoniCHIP Ontario will also feature in our program a dental impression system using a wax wafer. (see photo above)
