Date of Payment

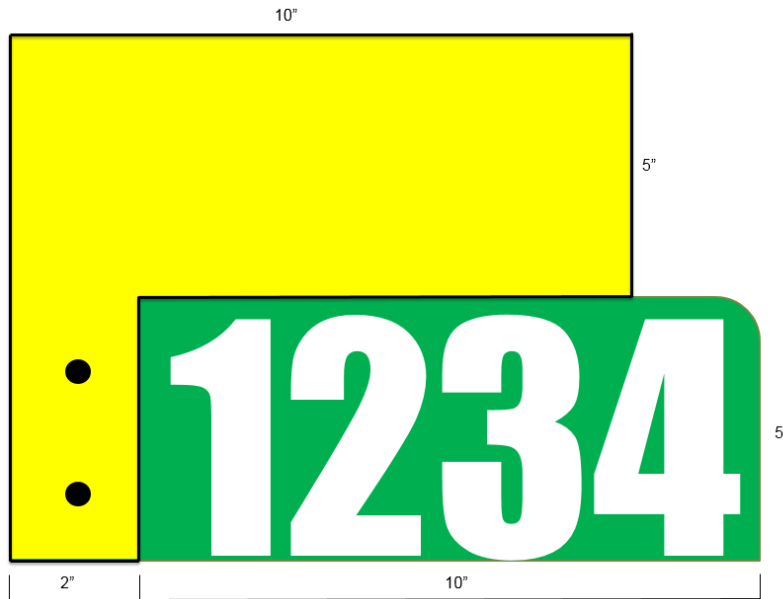

Receipt Number

The Township of Ramara requires all properties with solar panels or standby generators to have signage visible from the road that indicates their presence. There is a greater risk to firefighters when responding to a home with alternate power sources. Solar panels can be especially dangerous as it is impossible to cut this power supply completely. The panels are hard to see at night, and integrated panels are nearly impossible to see at any time of day. This means that firefighters could be dealing with a live circuit without knowing it. Thank you for helping to keep our firefighters safe!

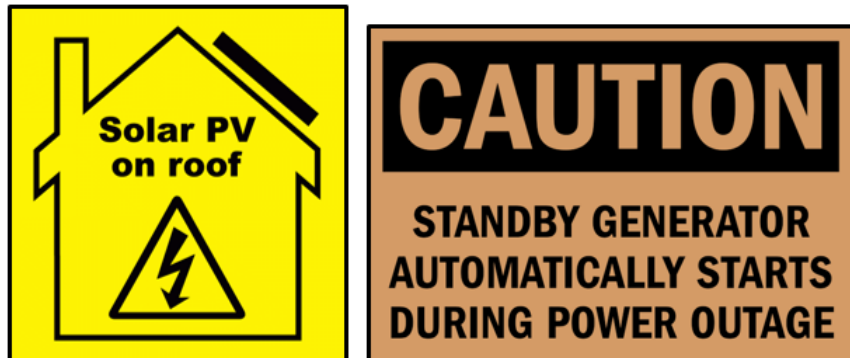

TOWNSHIP OF RAMARA
ALTERNATE POWER SIGNAGE

The alternate power signage will be installed overtop of your green blade, as seen below.

Depending on the alternate power source/s you have, the images below will be stuck onto the yellow blade. These are the stickers you will be purchasing.

Thank you for helping keep our firefighters safe!
