Applicable Laws & Building Permits

The *Building Code Act* prohibits the issuance of a building permit if the proposed construction or demolition will contravene an applicable law as defined by the building code. Approvals from other agencies are required in many instances before a building permit can be processed and issued. These approvals are **not** administered by the Building Department. The fastest way to obtain a building permit is to ensure all these other approvals are completed (or do not apply) before applying for a building permit. The Building Department is required by law to prioritize applications that are fully complete in terms of applicable law approvals and document submissions. Building permit documents must be consistent with applicable law approvals.
